Summary

Senior Frontend Engineer specializing in building highly performant, accessible web applications and scalable design systems with a focus on delivering an exceptional user experience. A dedicated mentor passionate about elevating team members and fostering a culture of technical excellence.

Technical Skills

Languages	TypeScript, HTML, CSS
Frameworks & Libs	React, Next.js, Node.js, GraphQL, Tailwind, React Aria
Testing	Jest, React Testing Library, Playwright, Cypress, Vitest
Architecture	Microfrontends, Design Systems, Accessibility (a11y), Web Performance, Web Vitals
Tools & Platforms	Docker, CI/CD, Git, Vite

Professional Experience

March 2024–June 2025	Senior Frontend Engineer, Enso Analytics, Remote <ul style="list-style-type: none">○ Played an instrumental role in the first public release, delivering key features that directly contributed to attracting the first paying customers.○ Boosted file manager performance by 1000% (10x) by re-architecting data handling, significantly enhancing responsiveness for large-scale data operations.○ Engineered the end-to-end development of critical application features, including the billing system, user onboarding, invitations, and authentication flows.○ Resolved a critical, long-standing worker overload issue, leading to enhanced system stability and saving thousands of dollars monthly in infrastructure costs.○ Architected and built a new design system from scratch using Tailwind and React Aria, unifying the user interface and accelerating future development velocity.
Aug 2023–March 2024	Senior Frontend Engineer, Yandex, Moscow, Russia <ul style="list-style-type: none">○ Led a cross-functional initiative with QA to overhaul the testing process for the high-traffic search page, significantly improving test reliability, stability, and speed.○ Developed and rapidly prototyped a product recommendation chatbot, then collaborated with a separate market team to successfully launch it as an experiment in the main marketplace app.○ Redesigned a core product card component on the search results page to improve accessibility, composability, and maintainability.○ Mentored junior engineers and interns, providing technical guidance and support that enabled them to make successful contributions to the team's projects.
Feb 2022–May 2023	Senior Frontend Engineer, Cube Dev, San Francisco, USA <ul style="list-style-type: none">○ Automated the release lifecycle for the open-source UI-kit by building a CI/CD pipeline from scratch, integrating unit/screenshot testing, linting, and versioning to improve release quality.○ Engineered a custom, high-performance flame graph rendering engine using only React and CSS, achieving rendering speeds that surpassed key competitor benchmarks.○ Developed a complex, real-time query logging page featuring advanced filtering and timeline visualizations, providing users with nearly instant feedback on data-heavy operations.

- May **Senior Frontend Engineer**, *Leroy Merlin*, Moscow, Russia
- 2019–Dec 2021
 - Spearheaded the architecture of a new **microfrontend ecosystem**, boosting Lighthouse performance scores to **90+ for mobile devices**.
 - Co-led the development of a company-wide UI-kit adopted by over **100 developers**, standardizing the user experience across multiple products.
 - Drove test coverage from **15% to over 84%** across frontend projects, significantly improving code quality and reducing production bugs.
 - Cut Server-Side Rendering (SSR) time by **50%** at the 95th percentile, enhancing initial page load performance.
 - **Mentored fellow engineers** and **conducted technical interviews**, contributing to the growth and skill elevation of the frontend team.
- July **Middle/Senior Frontend Engineer**, *CASHOFF Russia*, Yaroslavl, Russia
- 2017–May 2019
 - **Led a team of four frontend engineers**, providing mentorship and technical guidance.
 - Architected a new theming system that reduced the time to create and support 12+ unique themes by **50%**.
 - Introduced a new **design system and UI-kit**, improving collaboration between design and engineering.
- July **Full Stack Engineer**, *Yusto*, Yaroslavl, Russia
- 2016–July 2017
 - **Optimized frontend performance** for multiple e-commerce platforms.

Education

- 2012–2016 **Bachelor's Degree in Computer Science**, *Ivanovo State Power University*, Ivanovo, Russia
