Summary

Result oriented frontend developer with experience in building performant, maintainable web applications.
I have experience in building rich SPAs with charts, complex logic and native-like UX along with performance-oriented e-commerce websites.

I love to speak the same language with UX Designers, that's why I love to create Design systems and UI-kits with focus on UX, a11y and composability.

I don't discriminate anyone by race, religion, color, national origin, gender, sexual orientation, age, marital status, or disability status

Experience

Senior Frontend Developer

Cube

Feb 2022 - Present (1 year 3 months)

Senior frontend engineer

Leroy Merlin

May 2019 - Dec 2021 (2 years 8 months)

Key results:

- New main page built using webcomponents.

- New header.

- Microfrontend architecture, template, tech stack, best practices, pipelines, recommendations, quality requirements made from scratch

- New product listing page built using new microfrontend approach (Lighthouse perf score > 90 at mobile).

- SSR time reduced to 40ms at 95 percentile

- Improved test coverage from 15% to 84%

- Performance testing as a part of microfrontend's pipeline

- As a lead maintainer in collaboration with designers made UI-kit

- Functional cross-browser testing using CodeceptJS(Playwright)

- Tech interviewing

- Mentoring

Middle/Senior frontend engineer

CASHOFF Russia

Jul 2017 - May 2019 (1 year 11 months)

Key results:

- Created all new webapp with a lot of data visualization and rich user interactions using react, kefir.js, d3 and typescript.
- made new theming system, time to create and support multiple (somewhere around 12) themes reduced by 50%.
- Leading team of four frontend engineers.
- Interviewing frontend engineers.
- In collaboration with designers introduced design system and ui-kit based on it.
- Significantly reduced number of problems with backend and automate local deployment using docker.
